

Supporting Indigenous solutions and adaptation for a changing world

Why Choose KAI

Trust

KAI has been a trusted partner of Indian Country for over 30 years

Empowerment

KAI fosters the strength, resilience, and Indigenous knowledge of Native communities, supporting them in identification of resources and planning for solutions

Expertise

KAI brings deep knowledge, experience, and a network of SMEs, ensuring high-quality and effective solutions

Overview

KAI has long been committed to supporting and uplifting underserved communities, especially by enhancing the health and well-being of American Indian and Alaska Native (AI/AN) populations throughout Indian Country.

Acknowledging the interconnectedness of health and the environment around us, KAI leverages the strength, resilience, and Indigenous knowledge of Native communities, supporting each with planning for climate change, identifying and securing resources, and implementing solutions. KAI works with communities to foster meaningful dialogue among stakeholders, governments, and organizations to address pressing issues around environmental health, protection, and mitigation; climate change planning and adaptation; and clean energy, while respecting tribal sovereignty.

Engaging our deep expertise, lived experiences, and extensive network of SMEs, KAI emphasizes collaboration and teamwork as essential components for translating discussions into concrete actions and measurable progress. Grounded in a commitment to strength-based approaches rooted in tribal cultures and traditions, KAI is dedicated to **doing work that matters** and drive positive change within Native communities.

Services
